

FACT SHEET

Game Name: [Hamsterdam](#)

Development Studio: [Muse Games](#)

Hamsterdam Short Description:

The once peaceful town of Hamsterdam is in danger! The vile chinchilla Marlo and his Vermin Gang are wreaking havoc and terrorizing the town. Enter our hamster hero, Pimm, who must harness his mightiest martial arts powers and kick tail through district after district, on a heart-pounding journey to take down the Vermin Gang, save his grandpa, and restore peace to Hamsterdam.

Hamsterdam is a game where classic brawler mechanics meet rhythm and precision. You'll need a blend of martial arts combos, quick reactions, and timely counters to survive vermin confrontations and boss battles. Swing, swipe and strike your way through the mean streets of Hamsterdam with gesture controls for Switch, touch for iOS or full controller support for a classic experience on PC. Whichever platform you choose, you can experience frantic action, flawlessly execute rhythm combos, and become one with the Hamster-Fu.

Background:

Lurking just beneath the facade of tranquility in Hamsterdam, vermin skitter in the sewers and stalk the alleys bathed in red light, carrying out the sinister plans of the vile chinchilla Marlo. When the spreading vermin turf war and the distribution of the libation Marlo Tonic reached a once peaceful neighborhood, Pimm and Grandpa, the old Hamster-fu master, stood up for the innocent. In a selfless sacrifice to stop the pestilence, Grandpa yielded to Marlo's cronies, passing the mantle of resistance to Pimm. Pimm now holds the fate of Hamsterdam in his paws.

Features

- Swing, beat, swipe, and tap your way to epic vermin beat downs
- Unique brew of classic frenetic brawler, rhythm, and quick reactions
- Master the ancient hamster martial art form; Hamster-Fu
- Heart & fist-pounding boss showdowns. The skies rain bombs! Try dodging 1,483 of them
- A chinchilla mob boss plus a gang of trash can wearing, tonic chugging vermin
- Rescue Hamsterdammers and Grandpa, and lead the resistance to save Hamsterdam
- From Couture to Streetwear - offering the finest hamster apparel for on-point beatdowns.
- Ride in style on the Ham-mobile: a two wheeled, chrome plated, pipe-grinding scooter

About Muse Games:

Muse Games is an independent game development studio in NYC focused on boundary pushing co-op gameplay and AI, with the aim of bringing people closer together through games. Muse Games' recent project was the award-winning and best-selling Guns of Icarus series on Steam and PS4 that features team-based multiplayer airship combat set in a post-apocalyptic, steam/dieselpunk-inspired world. Other projects include the App Store Game of the Week featured platformer CreaVures set in a decaying mystical bioluminescent forest. Currently, we are training a kung-fu fighting hamster named Pimm and empowering the youngling to lead an uprising against the vermin that have taken over the town of Hamsterdam. Other upcoming projects explore a desolate but spiritual planet, the impact of technology on human consciousness, and playing with fire, irreverently.
